CLIMALITE®

Expelling sweat away from your body
— Stay-Dry, Stay-Cool —

ClimaLite fabric wicks and transports liquid sweat away from the skin to the outer fabric face for quick evaporation.

ClimaLite thus enhances the body's natural temperature regulation functions.

PRIME SERIES WITH DRY DYE TECHNOLOGY

To get **COLOR** into our clothes
— the textile industry needs —

1 Mediterranean Sea
every 2 years!

What is DryDye?

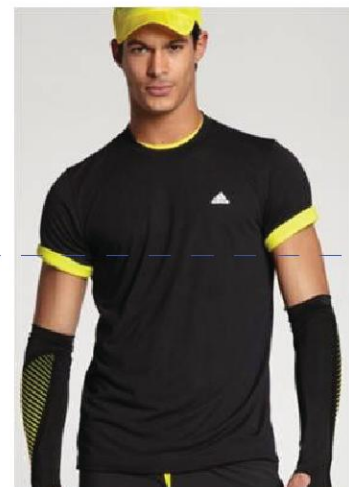

A way to dye fabrics using
— pressurized CO₂, not water —

NO WATER USED

Saves 25 Liters per Shirt !!

Uses 70% less energy

Uses 50% less chemicals

BOUNCE™

Bounce® replaces traditional foam midsole material with bouncy, structured elements that stretch and pop back to launch you into your next step.

Bounces structured midsole features elements that stretch and pop back to launch you into your next step.

Bounce® feels great and packs explosive energy into every step.

Your foot ends up doing a lot less work, so you can have a lot more fun.

NOSEAM™

NoSeam Fit™

Until now, the only way for a shoe to fit the shape of your foot was by sewing separate panels of fabric together. The byproduct of this design was irritating seams that created chafing and blisters throughout the shoe. NoSeam™ Fit™ bonds the frame of the shoe directly onto the upper's mesh using a flow molding process which eliminates the need for seams and overlays. The result is a soft, anatomical fit in the forefoot and a more comfortable, lightweight, flexible, and breathable shoe overall.

CLIMACOOL™

ClimaCool™ uses open mesh, breathable materials and ventilation channels to provide 360° cooling around your entire foot.

The constant flow of cool air helps evaporate sweat and lower the temperature inside your shoe. And a cooler foot means a cooler athlete.

As the heat witts the competition, ClimaCool™ air-conditions your every step, giving you an extra kick all the way to the finish.

CLIMAPROOF™

A lightweight, breathable membrane that surrounds your foot, keeping wind, rain and snow out while allowing heat and sweat to escape through evaporation.

ClimaProof™ keeps your feet warm, dry and comfortable when the snow is blowing sideways and the competition has gone indoors.

Mud, snow, ice and rain have no control over your training routine thanks to the protective powers of ClimaProof™.

FORMOTION™

ForMotion™ is a freely moving heel system that is de-coupled allowing your foot to adapt to the ground and adjust to your sporting movement.

Your foot experiences a much smoother, balanced and natural touchdown with ForMotion™ beneath you feet.

ForMotion™. At one with a body in motion.

FORMOTION®

ForMotion® is a freely moving heel system that is de-coupled allowing your foot adapt to the ground and adjust to your sporting movement.

Your foot experiences a much smoother, balanced and natural touchdown with ForMotion® beneath you feet.

ForMotion®. At one with a body in motion.

geoFIT

An internal footwear technology that enhances fit and comfort by placing padding in anatomically correct areas.

adiPRENE®

adiPRENE® is a highly shock absorbent material that cushions and protects your heel at impact.

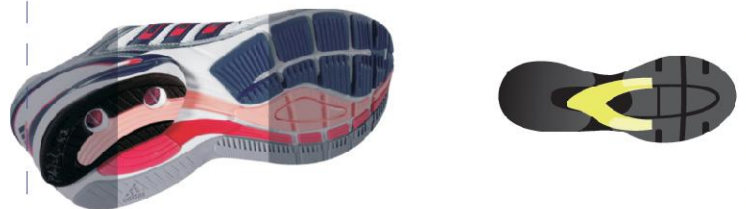

adiPRENE⊕

Resilient cushioning used to protect the forefoot and provide a responsive, dynamic toe-off.

TORSION SYSTEM®

Lightweight arch support that allows the forefoot and rearfoot to move independently for better surface adaptation and stability.

ADISONIC M

Profile : Contemporary looks and a great roll off makes this an easy choice for anyone and everyone who wants to get out on the road and have some fun.

Upper : Air mesh upper for maximum ventilation.synthetic pattern with screen print increases the overall look of the shoe.
